PMP Certification Course

About the course

A Project Management Professional (PMP) certification involves training an individual to develop skills in project management. In today's world, where opportunities are endless, the need for skilled project managers is key to driving a successful organization.

Based on the PMBOK Guide, this certification equips you to go through all the steps in acing the latest PMP Examination on your first attempt! This course is carefully curated with the understanding that practical skills must accompany concepts and techniques to manage projects successfully. It also helps participants develop critical thinking, problem-solving, and communication skills, which are critical to having a successful career as a project manager,

Education Nest

About Education Nest

Course Structure and Intended Learning Outcomes

Course Contents

The PMI PMP certification by Education Nest training covers the following topics, using PMI official content. The course can be structured as follows, with the duration of each topic varying based on the training provider:

Module 1

1. Introduction to PMP certification
2. Project Management Framework
3. Project Integration Management

Module 2

1. Project Scope Management
2. Project Time Management

Module 3

1. Project Cost Management
2. Project Quality Management

Module 4

1. Project Resource Management
2. Project Communications Management

Module 5

1. Project Risk Management
2. Project Procurement Management
3. Project Stakeholder Management
4. Professional Responsibility and Ethics

The above topics cover the ten knowledge areas outlined in the PMI's Project PMBOK essential for successful project management. The topics provide an in-depth understanding of project management concepts, techniques, and best practices.

The PMI PMP certification training course also includes practice tests, quizzes, and hands-on exercises to help participants prepare for the PMP certification exam. Participants will learn how to apply the knowledge and skills acquired during the course to real-world project scenarios.

By the end of the course, participants will have the required 35 contact hours of project management education to be eligible to take the PMP certification exam.

This training has been designed as an instructor-led participatory program that would build upon the experiential learning of participants. Our training methodology is underpinned by andragogical principles of peer learning, and learning by doing gives an understanding of various aspects of corporate social responsibility.

Program Outcome

By the end of the course, participants will have the required 35 contact hours of project management education to be eligible to take the PMP certification exam.

This PMP training program is designed to be instructor-led and participatory, with a focus on building upon participants' experiential learning. Our training methodology is rooted in andragogical principles of peer learning, which allow for a collaborative and interactive learning experience. Through hands-on activities, participants will gain a comprehensive understanding of various aspects of Project Management.

Learning Methodology

The learning methodology will include interactive Sessions/ lectures by experts from the industry, Q&A, discussion, case studies, and expert learning.
